Bob Kahn's Conclusions at a DoD Conference

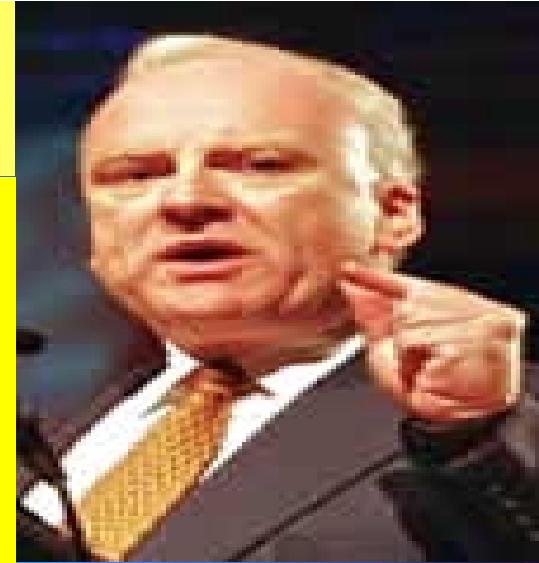

- IPv6 is under hyped (for what it really will do)
- Industry cannot make it happen
- DOD must return to leadership

*Richard Clarke, Special Advisor to the President for
Cyberspace Security, Critical Infrastructure Assurance
Office (CIAO)*

Recommendations of ISOC/IAB/IETF INET 2002 June 19

Brian Carpenter

- - the proliferation of NATs makes end to end encryption or authentication difficult, meaning we need to actively deploy IPv6 in routers and end nodes to eliminate that issue. Please specify IPv6 support on all future procurements (shades of GOSIP)

IPv6 Promotion Council

➤ *Claudie Haigneré, ministre chargée de la recherche et des nouvelles technologies, Elle a insisté sur la nécessité de développer l'IPv6, "protocole Internet de demain" en remplacement de l'IPv4 et sur la volonté du gouvernement de contribuer à l'émergence du Wi-Fi, norme permettant de créer des réseaux "sans fil".*

**world summit
on the information society**
Geneva 2003 - Tunis 2005

We are interested in exploring the creation of an interface between the
IPV6 Task Force and the Summit. In order to grow awareness of these
matters among all stakeholders participating at all stages in the Summit
process we welcome a meeting facilitating a joint initiative.

I look forward to hearing from you at your earliest convenience.
Regards,

Louise Lassonde, PhD., Civil society Coordinator
Executive Secretariat, World Summit on the Information Society
